WORK EXPERIENCE

Revalon Finance | Co-founder & CTO

April 2026 - Present

Remote

- Architected and shipped **Revalon Finance**, a floor-aware lending MVP with smart-contract custody, deterministic underwriting, and onchain loan lifecycle orchestration.
- Increased capital efficiency by enabling **up to 80% LTV** on matched YES/NO collateral and validating **80 pmUSD loans against 100 pmUSD** recoverable collateral
- Designed Predexy's core multi-exchange pipeline across 7 venues for data ingestion, normalization, semantic matching, and **arbitrage detection**
- Delivered production-grade platform features including authentication, RBAC, **invite flows**, rate limiting, job orchestration, and wallet tracking for **Polymarket** positions
- Built market-matching systems with embeddings, vector search, and lexical scoring to map equivalent questions and surface direct and **Dutch-book opportunities**.

MetaKeep (Acquired by Rezolve | NASDAQ) | Senior Software Engineer

April 2025 - April 2026

San Francisco, Remote

- Architected the core acquisition showcase for Rezolve AI, engineered an end-to-end crypto payment flow integrated into a chatbot for luxury retail (Pandora) March 2026.
- Built MetaKeep's onramp from **zero to production**, integrating the Coinbase API and MetaKeep SDK to enable zero-fee, sign-up-free crypto purchases
- Led rollout of Wallet Isolation, an enterprise-grade security feature that reduced **pre-production bugs by 40%**
- Built a **MoonPay-based** fiat-to-\$LOOK on-ramp that chained card purchases through **Jupiter swaps** and auto-deposited tokens into MetaKeep wallets
- Designed an on-chain **USDC transfer system** using SPL-token delegation, eliminating repeated approval flows
- Delivered **8 mobile apps** (6 Android, 2 iOS) showcasing SDK integrations for Solana + Ethereum transactions

Quranium L1 | Blockchain Developer Intern

October 2024 - March 2025

Remote

- Built an MVP of a decentralized exchange using **Uniswap v3** token swapping module and a multi-signature wallet for Quranium

OPEN SOURCE CONTRIBUTIONS

AOSSIE | Contributor

Jan 2025

- Contributed **4 merged PRs** to **FairFund** smart contracts, reducing gas costs by **25%**, fixing critical bugs, and increasing test coverage to **100%**

TECHNICAL SKILLS

Go, TypeScript, JavaScript, Solidity, Rust, Next.js, React, Node.js, PostgreSQL, Redis, Docker, Terraform, Linux, CI/CD, EC2, AWS Nitro Enclaves, MongoDB, Prisma, Kotlin, Swift

EDUCATION

JECRC University

Graduated

Bachelor's Degree in Computer Applications
